See back page for important things you should know.

For the purposes of Telstra Mobile Satellite pricing, "Australia" means anywhere on the Australian land mass and its external territories (such as Lord Howe, Norfolk, Heard, Christmas, Cocos and Macquarie Islands, but excludes the Australian Antarctic Territory) and extends to include a boundary of up to 200 nautical miles around the Australian land mass and external territories.

### Important things you should know

\* Where there is a clear, wide direct line of sight between your handset and the sky. The quality of service may be affected by things such as the atmosphere, environment and surrounds, including where there is a narrow view of the sky due to things such as thick canopy cover being in a narrow gorge or between dense tall buildings.

Iridium Satellite LLC is prohibited from providing products and service to some countries. At present these include (and are subject to change): Afghanistan, Northern Sri Lanka, Cuba, Iran, Libya, North Korea and Poland. Therefore, use of your Telstra Mobile Satellite phone in some countries may be illegal.

If you use your Telstra Mobile Satellite phone to access the service from overseas, you do so entirely at your own risk and you are responsible for all call costs incurred while using Telstra Mobile Satellite overseas, including any charges levied by the local carrier.

1. The subsidy is up to \$1000 off the retail price of the Mobile Satellite handset.
2. Unused calls expire monthly.
3. To be eligible for the Group Plan a minimum of 2 active services, each on a TMS 30, TMS 50, TMS 80 or TMS 125 plan must be connected on the one Group Plan account. If the total combined monthly access fee of the services on the Group Plan is less than \$150, then you will be charged \$150 as the monthly access fee for the Group Plan.
4. There is no voice call capability with the TMS Data Only plan; data calls only can be made.

# You're never far away with Telstra Mobile Satellite

Telstra Mobile Satellite (TMS) is a great communication solution that keeps you close to your business, or family and friends from most places in the world! And TMS has never been better value with included calls, great plans and easy repayments.

## Save up to \$1000 off your Satellite Phone with the Satellite Phone Subsidy Scheme<sup>1</sup>

Before buying a handset, it is worth checking if you are eligible for a handset subsidy which is available to people who live, work or operate a business in an area not served by the traditional terrestrial (GSM, Next G™ or CDMA) mobile networks.

The Australian Government operates the Satellite Phone Subsidy Scheme for Australian residents of all States and Territories. You can find out more about the Scheme and whether you are eligible by calling 1800 674 058 or from [www.dcita.gov.au/satphone](http://www.dcita.gov.au/satphone).

Telstra Mobile Satellite dealers have full details of the Government Scheme and can assist you with additional information and any contacts.

*Please note: the application for the government subsidy must be made before you purchase your handset.*

## Take the Mobile Repayment Option

Telstra's Mobile Repayment Option (MRO) is an easy way to purchase a Telstra Mobile Satellite phone, when you connect to any of the 24 month Telstra Mobile Satellite service plans outlined in this brochure.

Upon purchasing the handset, you pay the difference (if any) between the deferred amount and the price of the handset.

During the 24 month MRO contract term you will need to repay the deferred amount in equal monthly installments. Your MRO repayments are in addition to your Telstra Mobile Satellite service plan monthly fees and usage charges.

## Great \$1995 starter package

Start staying in touch with a Telstra Mobile Satellite Iridium 9505A handset package. The package is available when you connect to a Telstra Mobile Satellite Plan for 24 months. See pricing table for full plan details.

The package includes:

*Tough & durable handset*

*High Capacity Battery*

*Personal Handsfree*

*Portable auxiliary antenna*

*Antenna Adaptor*

*DC Car Charger*

*Ac Charger with International Plug Kit*

*Leather carry case*

*User Manual*

## Value for your money

*A range of simple plans*

*Easy to use*

*Great voice quality*

*Direct access to emergency 000 from within Australia*

*No charge to receive calls worldwide*

## Fixed installation option

Perfect for private or business use in remote Australia where connectivity rather than handheld portability is required. With this compact fixed desk top unit a normal phone handset can be used via the satellite network, as well as providing a port for access to the Internet and private data networks.

## Hard working optional accessories

Select from a range of top quality accessories designed to complement your Telstra Mobile Satellite phone perfectly.

Accessories include:

*Fixed mast marine antenna*

*Mobile MAG & bolt antenna*

*Data kits*

*Cable kits*

*TMS Integrated Car Kit for the 9505 and 9505A satellite phones.*

## Telstra Mobile Satellite Value Added Services

### Mobile Memo

Mobile Memo is a 24 x 7 messaging service that is answered by a receptionist who uses your personalised greeting to answer your calls and then relays any messages to your Telstra Mobile Satellite service by email or short text messages (SMS).

### MessageBank®

For times when it's not convenient to (or you don't want to) answer calls, Telstra Mobile Satellite customers can have their calls answered by Telstra Mobile MessageBank®.

Telstra Mobile Satellite mailbox operation is the same as for mail boxes on other Telstra mobile phone networks but higher diversion and retrieval charges apply to Telstra Mobile Satellite MessageBank® calls. See pricing table for full details.

### SMS

Using the Telstra Mobile Satellite network, Iridium 9505A handsets are capable of sending and receiving SMS from the Iridium 9505A handset.

### Data

Telstra Mobile Satellite is able to support two types of data access within Australia and is particularly useful for people working in analytical professions such as geology, mining and exploration. However, you must request to have data access on your Telstra Mobile Satellite service and an additional monthly fee and usage charges will apply.

Dial-Up Data uses the Telstra Mobile Satellite service to provide a dial-up connection using your Iridium handset to another computer, a corporate network/LAN or an Internet Service Provider (ISP). This service can deliver a data rate of up to 2.4 Kbps.

You can use the Dial-Up Data service just as you would use the modem on your computer to dial a call through the public switch telephone network (PSTN).

Direct Internet Data uses the Telstra Mobile Satellite service to provide an Internet connection via dedicated servers at the Iridium gateway. This service utilises transparent compression, and can result in a data rate of higher than 8.0 kbps. Throughput will vary depending on the size of the content being uploaded and downloaded.
